XLP CARRIER AUTOGRID OPTION

LOAD WITH EASE

The XLP Carrier Autogrid Option from Jerr-Dan allows you to quickly and easily hook to a car without installing L-Arms manually.

Engineered with the operator in mind, the grid design offers a 3,500-lb rating and can rotate 90°. The grid center drop area is designed to provide better support for tires, and the center detent helps prevent crossbar swing during hook-up.

Available with a variety of options including: wireless remote control, Reese Hitch attachment, hook-up and back-up cameras.

See your Jerr-Dan distributor for more details.

SPECIFICATIONS	
84-in Wide Crossbar	Accommodates loading wider vehicles.
Full 180° L-Arm rotation	Full rotation of L-Arms eliminates need for aluminum spacers.
Designed with ease of service in mind	Built with replaceable wear pads, L-Arm tips, and grid ends.
