NEW MODEL

E25MCL

Vertical Lift

Delivering durability, maneuverability, serviceability and productivity with indoor and outdoor capabilities and new key technologies.

ACCESSORIES
Add a USB Charger and Phone Cradle for added operator comfort.

SKYSENSE® WITH COLLISION AVOIDANCE OPTION
Provide operators with an added level of awareness of immediate surroundings and expanded sensing coverage around the platform and chassis with the optional enhanced detection system.

SWAPPABLE PLATFORMS
Customize your vertical lift for the job to be done with platforms such as the standard extendable platform (shown) or the optional 22 x 18-in ceiling tile platform or maintenance tray platform (coming soon).

PROGRESSIVE ELEVATED DRIVE
Automatically adjusts drive speed based on platform elevation to increase productivity.

CLEARSKY SMART FLEET™
Industry-first two-way data transmission evolves one-way connectivity into true fleet interactivity. And, get at-a-glance fleet charging visibility with the ClearSky Smart Fleet™ beacon's new charging status indicator.

PEAK SERVICEABILITY
Maximize uptime and simplify maintenance with serviceability-focused enhancements, including batteries located under the hood, simplified harness routing and minimized overall parts count.

ADDITIONAL BATTERY OPTIONS
AGM and Lithium-ion batteries are an option for lower maintenance, longer battery life, and faster charge time.

VARIABLE TILT TECHNOLOGY
This JLG® exclusive technology maximizes your work envelope when working on slight slopes.

MAX LEAK CONTAINMENT STANDARD
Built-in trays designed to hold 100% of system hydraulic fluid to protect delicate work surfaces and optimize the environments in which you can work.

ZERO TURN RADIUS
Navigate tight turns around compact job sites, like data centers, with ease.
