SKYWELDER®
BOOM ACCESSORIES

SAVE TIME AND MONEY

Fully utilize your boom lifts with the JLG SkyWelder. A 280-amp Miller® CST™ 282 welder positioned beside the control station conserves space and provides fully integrated welding capability. Free yourself from potentially dangerous leads hanging over the rails and the unnecessary cost of a stand-alone welder and power supply.

FEATURES AND BENEFITS:

- Save time by eliminating the need to move weld leads and reposition the welder
- Save on fuel costs by using a diesel powered welder/generator
- Save on rentals with the average freestanding welder rentals
- Reduce weld cable damage with factory-routed cables
